

University
of California

Mirra, Oregon.

20. April 1890.

My dear Dr. Watson:

I was pleased
to receive your report on
the Woodcockeas.

I had sent a set to
Dr. J. Greene, a short time
before I heard from you.
He wrote me but sent
no determination ex-
cept on D. Hendersoni
upon which you both agree
and 18-27 which he pur-
poses to call D. buschii
n. sp. - you D. dummaichi
n. sp.

I suppose you have seen
what Mrs. Brandegee writes

about the genus in
"Lor"?

Prof Greene says furthermore
that in purple flowered
Tripolium eriocephalum is
the same that Howell has
published as *T. Harneyensis*.

With best wishes for
your health & prosperity I am
as ever yours truly
Wm C. Cusick
